

## Announcement for the Election of the Autonomous AStA Department of International Students

This semester, the election of the AStA Department of International Students will take place through **mail-in ballots only**.

All international and foreign students at JGU Mainz are eligible to vote.

Starting now, mail-in ballots may be requested from the election committee.

You may email your informal ballot request to [autonome-wahlen@stupa.uni-mainz.de](mailto:autonome-wahlen@stupa.uni-mainz.de) from your **students email address** or mail it to:

Wahlausschuss Referat AStA International  
c/o AStA Uni Mainz  
Staudingerweg 21  
55128 Mainz  
Germany

It is necessary that you **attach your certificate of enrolment for the winter semester 2020/21** to the respective request.

Moreover, please include **a current postal address** to which you would like the voting documents to be sent and state **for which autonomous departmental election(s) you are requesting a ballot**.

**Requests for mail-in ballots** must be received by the election commission **no later than 3 February, 2021, at 10 am CET**.

**Completed (filled out) ballots** must be received by the election commission **no later than 15 February, 2021, at 3 pm CET**.

The following candidates are running for office (in arbitrary order created by lot by the election commission):

1. Peiman Niaei
2. Paolah Buces Alfonso
3. Luis Angel Diaz Molina
4. María de Lourdes Ortega Méndez
5. Daria Neklesa

Up to three votes may be cast. If no candidate is selected, the ballot will be counted as an abstention. If more than one vote is allocated to a candidate, if more than three votes are cast, or if remarks are added onto the ballot, the ballot will be void and the votes will not be counted.

For information concerning the election newspaper in which the candidates introduce themselves, please see the attachment to the voting documents.

We are hoping for a high turnout!

Mainz, 27 January, 2021

On behalf of the election commission

Carina Lang, election commissioner
